

## FA40

### DATASHEET

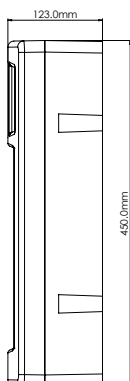

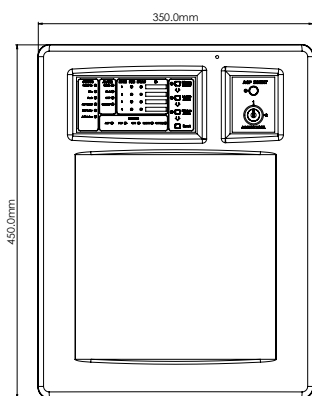

#### FireAlert Smoke Alarm System Residential Control & Indicating Equipment - RCIE

Brooks FA40 is a 4-zone RCIE, designed specifically to meet the requirements of AS 1670.6:2023 and NCC Specification 23 for residential care buildings such as community housing, aged care, or where the smoke alarm system application requires more than a basic system of up to 20 interconnected smoke alarms.

Compact aesthetic design for discreet installation in residential settings, the FA40 manages up to 40 fire alarm devices across 4-zones. Compatible with the full range of FireAlert devices.
