### Product Description

The EIB411RF remote control is designed for use with the RadioLINK range of products. It increases the flexibility and user friendliness of the alarms by allowing the user to remotely "Locate", "Hush" and "Test" the alarms in the system.

- Locate the source of the alarm
- Hush any nuisance alarms
- Test alarm system
- Alarm memory identifies units that have previously alarmed (useful for troubleshooting)

The EIB411RF remote control is powered by tamper-proof lithium cells designed to last the life of the product. The EIB411RF remote control uses advanced radio transmitter technology with unique software coding to transmit the radio signals, ensuring robust signal integrity.
