

End of Life Notice

Residential Fire Panel RFP - 6 / 12 / 18 Zones

Overview

This notice serves to inform all customers and partners that the RFP6, 12 and 18 zone systems have reached their End-of-Life (EOL) stage. This decision aligns with our product lifecycle management strategy and ensures continued delivery of innovative, compliant, and reliable fire safety solutions.

The retirement of the RFP6/12/18 is driven by factors such as component obsolescence, evolving industry standards, and the introduction of next-generation solutions offering enhanced performance and compliance.

Key Dates

- **End-of-Sale:** August 2025 – last date to place orders for RFP6 products
- **End-of-Maintenance parts:** subject to availability
- **End-of-Technical Support:** December 2030

Recommended Migration Path

Where the number of zones and devices fits, moving to the FA80 panel would be a beneficial upgrade, offering enhanced functionality, updated features, and ongoing support.

It's a good time to review your sites and plan for your product migration ahead of the End-of-Support date to prevent any service disruption.

The FA80 range is expected to launch in June 2026

Upgrade Support

Our sales and technical teams are available to assist with:

- Upgrade and replacement planning
- System compatibility assessments
- Migration strategy development

This support aims to ensure a seamless and efficient transition.
