

End of Life Notice

Residential Fire Panel BARFS1

Overview

This notice serves to inform all customers and partners that the Residential Fire Panel BARFS-1 system has reached its End-of-Life (EOL) stage. This decision aligns with our product lifecycle management strategy and ensures continued delivery of innovative, compliant, and reliable fire safety solutions.

The retirement of the BARFS-1 is driven by factors such as component obsolescence, evolving industry standards, and the introduction of next-generation solutions offering enhanced performance and compliance.

Key Dates

- **End-of-Sale:** August 2025 – last date to place orders for BARFS-1 products
- **End-of-Maintenance parts:** subject to availability
- **End-of-Technical Support:** December 2030

Recommended Migration Path

We recommend transitioning to the new FA40 panel, which provides improved functionality, modern features, and ongoing support. Please review your current installations and plan for migration before the End-of-Support date to avoid service disruptions.

The FA40 range is releasing in March 2026. Information on this exciting new product will be issued shortly.

Upgrade Support

Our sales and technical teams are available to assist with:

- Upgrade and replacement planning
- System compatibility assessments
- Migration strategy development

This support aims to ensure a seamless and efficient transition.
